BT3103 Lecture 3 In-Class Exercise

Application Systems Development for Business Analytics

Due: 8 February 2024 2359H

Task

1. Design the Cryptocurrency Tracker for 5 coins using the ccxt API (refer to slide 59) and submit **ONE** html file on Canvas.
   a. You are free to use any CSS.
   b. The prices should be displayed in real time.
      i. On page load, show the price automatically.
      ii. On clicking the "Refresh" button, update the price.
   c. Use <u>internal</u> CSS and JavaScript so that you submit only one file.

Slide 59 (Lecture 3)
